Nidec to Establish a Software Technology Development Center

- **To consolidate the entire Nidec Group's supervisory function and reorganize its Indian business base to shift toward software-oriented solution business -**

Nidec Corporation (the "Company" or "we") has announced today that it will establish a Software Technology Development Center (the "Center"), a facility to be under direct control of the Company's Chief Technology Officer ("CTO"), on October 01, 2026.

Background and purpose of launching the Center

As products become more sophisticated, software development is becoming increasingly important in recent years. Nidec is establishing this Center, which will integrate the entire Nidec Group's software, to further add value to the Group's products in the areas of focus and elsewhere, and to accelerate its structural shift from the conventional component-supplying business to a module and solution enterprise.

In addition, as part of the aforementioned strategy, NIDEC ADVANCE TECHNOLOGY INDIA PRIVATE LIMITED, a business base of Nidec Advance Technology, a subsidiary of the Company, in Bangalore, Karnataka, India, will be transferred to be under the Company's direct control. After being renamed NIDEC INDIA SOFTWARE CENTER PRIVATE LIMITED on November 01, 2026 (plan), the Indian facility will, with the Center's promotion, have its function enhanced as a global site to lead the entire Nidec Group's software development.

By building this unified management system, Nidec will optimize the allocation of the Nidec Group's internal software personnel and intellectual properties, prevent technology leakage, enable efficient development, and secure excellent quality.

Outlook of the Center

- Address: 2-8, Shin-Kawasaki, Saiwai-ku, Kawasaki-shi, Kanagawa (in Nidec Shin-Kawasaki Technology Center)
- Director: Hironori Wada
- The Center's main businesses will include:
 1. **Create high-value-added solutions:** Utilize software technology to sophisticate products and offer solutions.
 2. **Governance and consolidated resource management:** Integrated management of the Nidec Group's internal software personnel and intellectual properties and the cross-sectional supervision of quality- and security-related risks
 3. **Plan and develop development platforms:** Build a group-wide common software platform and a next-generation development process to support Nidec's next-generation product portfolio.
 4. **Optimum use of Nidec's global business bases:** Strengthen ties with NIDEC INDIA SOFTWARE CENTER PRIVATE LIMITED to be less dependent on external resources, prevent technology leakage, and optimize development cost.
