Nidec Debut Appearance at “OCP Global Summit 2026”

Nidec Corporation (“Nidec”) will make its first-ever appearance at the OCP Global Summit 2026, hosted by the Open Compute Project, held in San Jose, California, from October 12th – 15th. Nidec will showcase flagship Coolant Distribution Unit (CDU) models designed to address the thermal management challenges of rapidly expanding AI data centers. Join Nidec on October 14th for an exclusive Expo Hall Session and be sure to visit our booth display at Booth #E63.

The OCP Global Summit unites enterprise leaders, hyperscalers, data center operators, and hardware vendors to lead the standardization of next-generation technology infrastructure. Nidec will showcase its market-leading In-Rack CDUs alongside high-reliability In-Row CDUs designed to handle heat loads of any scale.

【Key Exhibited Products】

- **New In-Row CDU for 800VDC compatibility:** Leveraging deep design expertise and operational know-how, Nidec offers high-capacity, 800VDC compatible In-Row CDUs as an end-to-end total solution, complete with ongoing service and maintenance.
- **300kW In-Rack CDU:** Compact design in 4U height suitable for both 19” and 21” racks while maintaining an industry-leading cooling capacity. Nidec’s in-rack CDUs provide thermal management for high-density AI servers with efficient rack space utilization.

Please refer to Nidec’s dedicated website for additional information regarding Nidec’s participation at this year’s OCP Global Summit.
