Nidec Drive Technology to Exhibit Products at Automatica 2025 in Munich

Nidec Drive Technology Corporation (“Nidec Drive Technology” or the “Company”), announced today that it will exhibit its products at Automatica 2025, an event to be held in Munich from Tuesday, June 24 – Friday, June 27, 2025, at Messe München.

In this upcoming exhibition, the Company will feature the **launch of the new KINEX Cycloidal Drive**. Powerful Precision for the Robotics and Automation Industry—Nidec Drive Technology Corporation today unveils the new KINEX Cycloidal Drive—a low-noise, high-rigidity and economic solution delivering up to 5,500 Nm of precise, repeatable motion alongside FLEXWAVE, with customizable configurations and full global support for advanced robotics and automation.

About Automatica 2025:

- Period: Tuesday, June 24 – Friday, June 27, 2025
- Venue: Messe München (URL <https://messe-muenchen.de/de/>)
- Booth: Hall B6, Booth 323

Nidec Drive Technology’s exhibits will include:

- The strain wave gear based FLEXWAVE Series with the new FLEXWAVE WP 100 size
- The new multi-sensor integrated Smart-FLEXWAVE series
- Special Flat type D perfectly arranged for humanoid robotics as well as for medical technology
- The new KINEX – high precision large size cycloidal reducer line-up
- Precision planetary, hypoid and bevel gearboxes with PLANETGEAR, DYNAGEAR and POWERGEAR

The Nidec Drive Technology is further strengthened by our exceptionally robust Nidec Group solutions—integrating Nidec Automation and Nidec Drives (motors and inverters)—all backed by a highly skilled team and an extensive sales network across Europe.
