Nidec Group Companies to Exhibit Products at Exposition Mondiale de la Machine Outil(EMO 2025)

Nidec Corporation (TSE: 6594; OTC US: NJDCY) ("Nidec Corporation" or the "Company") today announced that the four machine tool companies of the Nidec Group—Nidec Machine Tool Corporation, Nidec OKK Corporation, Takisawa Machine Tool Co., Ltd., and PAMA S.p.A.—will exhibit at the Exposition Mondiale de la Machine Outil (EMO 2025), one of the world's four major machine tool exhibitions, to be held in Hannover, Germany from September 22 to 26, 2025.

Since entering the machine tool business in 2021, Nidec Corporation has expanded its product lineup and is now capable of offering optimal solutions for precision component machining—ranging from large machining tools, machining centers, and lathes to gear manufacturing machine tools, cutting tools, and metal 3D printers—across various industrial sectors including automotive, robotics, energy, aerospace, and more.

At EMO 2025, the four Nidec Group companies will **present their integrated machining units, automation systems, and other new products and technologies tailored to meet the growing global demand for automation and labor-saving solutions**, aiming to contribute to greater production efficiency in the industry. At their respective booths, the companies will also highlight some of their synergy-driven initiatives in areas such as technology development, production systems, and supplier integration, as they work under the "One Nidec" slogan to deliver unprecedented value to customers.

The four Nidec Group companies' main products will include:

Exhibitor name & Booth No. Product (★:new / to be unveiled to Europe)		Main feature
<u>Nidec Machine Tool & Nidec OKK</u>	Hall13-D02	The companies will unveil their horizontal five-axis machining center, the HX500, in Europe, and offer the VB-X350, a vertical five-axis machining center equipped with a pallet system, along with automation and labor-saving solutions.  Horizontal 5-axis MC HX500 The two companies will also showcase an internal gear grinding machine, as well as a range of solutions—including gear machines and broaches—for the automotive and other industries.  Internal gear grinding machine ZI25A
★ Horizontal 5-axis MC HX500 - <u>Vertical 5axis MC VB-X350</u> ★ <u>Internal gear grinding machine ZI25A</u> - <u>Cutting tool: Large broach</u> - <u>Metal 3D printer LAMDA series: laminated samples</u>		

<u>PAMA</u>	Hall13-B01	As a solution provider, the company will exhibit and demonstrate the SPEEDMIL3000B boring, facing, and drilling machine, which meets a variety of needs for large-component machining.	
- Floor type horizontal boring and milling machine SPEEDMILL 3000 B		Floor type horizontal boring and milling machine SPEEDMILL 3000 B	
<u>Takisawa Machine Tool & Taiwan Takisawa Technology</u>	Hall17-B44	The companies will exhibit their new-concept-based composite machining unit, "TEX-2500," and composite lathes to offer high-efficiency machining, while unveiling mass-production model TT-2100IIG and high-precision Swiss-type lathe ST-366 to the European market.	
★Composite machining unit TEX-2500S ★ Parallel Twin-Spindle CNC Lathe TT-2100IIG ★ Combined Machining CNC lathe TCY-200IIYSL5 - Combined Machining CNC lathe TS-4000IIYS - Turning center NX-2500YS - Turning center NT-2500M - Turning center LA-350YL8 ★ Swiss-type lathe ST-366		Composite machining unit TEX-2500S	Swiss-type lathe ST-366
