

AC Induction Gear Motor

Imperial Electric gear motors are built to last. The AC induction gear motors are rugged, designed for continuous duty over long years of use in a variety of applications. These gearmotors feature all-ball full bearing construction and 2 or 3 planet integral gearboxes. The motors have multiple power configurations and gearboxes feature different ratio and planet designs.

Specifications

- 120 & 240 VAC, 50 or 60 hz
- Motor rpm @ 60 hz = 1725
- Insulation Class F

Features

- UL and CSA listed
- Long operating life
- Integral, cast iron & steel gearbox
- Face mount in any direction
- 2 and 3 planet gearboxes
- 10:1 and 11:1 ratios
- High torque/low running amps
- 1 hp or 1.5 hp
- Dual voltage
- Rugged construction
- Start/Run capacitors
- Chrome or black motor bodies
- Various mounting patterns available
- Various power cord option

Applications

- Commercial floor care equipment
- Low speed scrubbers
- General purpose
