Series DT-326 Portable LED Stroboscope

The Series DT-326 is a portable stroboscope utilizing super bright LED's in a robust, durable

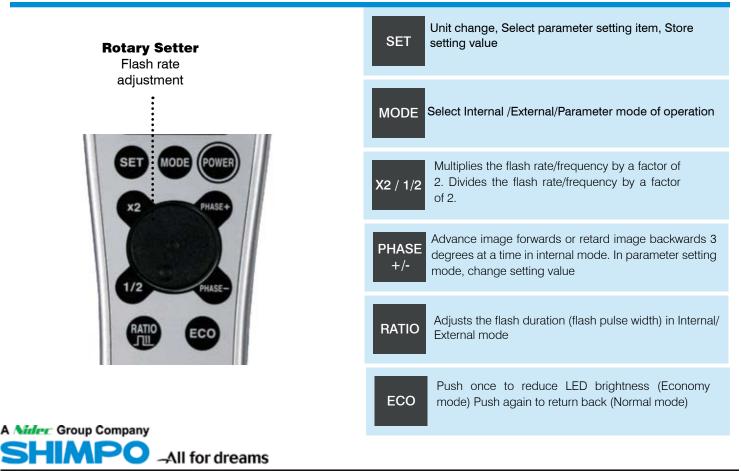

all metal design. The DT-326's unique LED array provides an accurate, stable strobe light. The innovative LED design allows for a longer flash life - 5 times longer than traditional xenon flashtubes! The DT-326 is designed for Speed (RPM) and Frequency (Hz) measurements in motion and vibration analysis. It is ideal for predictive and preventive maintenance applications such as: motors, shafts, roto-gravure printing, extruders, blow molding, wire lettering and striping, engraving, pulse jets, water jets, fans, cams, gear teeth, belt inspections, audio/speakers, fuel injectors, vibration analysis and cutting blade timing and sharpness. With its intuitive "ONE HAND" controls, vast adjustable flash rate, superior brightness, focus control, silent operation, AC/DC power flexibility, the DT-326 LED Stroboscope provides a superior value in a compact, ergonomic package.

Features

- Wide Flash Range 60 120,000 Flashes/min. (1-2000Hz) can be adjusted to meet almost any high-speed application
- Ratio Control (Flash Pulse Duration) Adjustable Flash Pulse duration achieves sharper images for critical inspection
- Line or Battery Power Operation AC adapter for continuous use or (4 x AA batteries) for maximum portability
- Phase Shift Advance or retard flash timing for viewing gear teeth, cutting surfaces, repeats or "drifting" images
- Input/Output Interface Input sensor triggers or Output synchronization controls

Easy Operation Control
