# PM-071 Features

## PM-071 Pugmill - ADD-A-VAC

PM-071 Pugmill's flexible design is available with or without an attachable vacuum unit, which enables the school or professional to upgrade equipment as needs change.

*Optional vacuum upgrade 1/3 HP, 5.3 Amps, 115 Vac, 60 Hz, pump with fittings (ACC-AV-071).*

- **HEAVY-DUTY ALUMINUM BODY** Extremely durable design for both school and professional applications; die-cast body resists corrosion, which prevents clay body contamination
- **UNIQUE FLEXIBLE DESIGN** Enables you to upgrade equipment as needs grow
- **POWERFUL 1 HP MOTOR** Blends and extrudes clay at 800 lbs./hour
- **SPECIAL TRIPLE SAFETY** Ignition key prevents unauthorized use; limit switch stops auger when exposed; prominent emergency stop button
- **STAINLESS STEEL AUGER** Non-corrosive surface easily moves clay through barrel
- **RETRACTABLE CLAY REST** Convenient for bagging clay; slides under pug mill to save space when not needed
- **EASY DISASSEMBLY BOLT SYSTEM** Designed for easy removal of barrel top, allowing for thorough cleaning of interior
- **OPTIONAL VACUUM ATTACHMENT** Models PM-071V & PM-071V-LS Powerful 1/3 HP vacuum pump is compact and easy to attach; operates at the flip of a switch with minimal loss of lbs/hour capacity
